

Dear Principal,

Those of us that are participating in the peaceful protest today are writing to express our collective concern and frustration with the growing trend of allowing biological males to use female restrooms and change rooms.

We find this 100% unacceptable.

We urge immediate action to address the situation. As students, parents, and concerned members of the community, we believe that females have the right to use restrooms and change rooms without biological males present. Historically, girls and women have enjoyed this safe space and we refuse to tolerate intrusions and invasions of privacy that compromise this basic right.

We insist that this school immediately institutes a policy keeping females safe and banning biological males from all female restrooms and change rooms.

Please present these demands to those who have the power to make this policy change. If our demands are ignored or dismissed, we will persist in our efforts to protect young women and make sure their voices are heard.

Thank you for your attention to this matter.

Sincerely,

---
